Dear Colleague,

My name is Jill Pavich, and I am the founder & CEO of edPioneer Consulting, LLC, a business that focuses on the curriculum design and sequencing needs of the 21st century high school, specifically those schools pursuing cutting edge, academic programs like the Advanced International Certificate of Education—offered through Cambridge University—and the AP Capstone program—offered through College Board.

edPioneer Consulting offers a range of services for teachers and administrators alike; from workshops to webinars, and from one-on-one coaching to tailored, curriculum design, it is my number one priority to help you build a plan that will not only engage your learning community, but empower it.

Students today need a unique blend of rigorous content mixed with soft skill mastery if they're going to compete in a modern, globalized market. As a genuine pioneer of modern education and lead authority in curriculums like AICE General Paper, AICE Global Perspectives & Research, and AP Seminar, I've learned a lot about what it means to teach in the 21st century classroom. Specifically, I have a great deal of knowledge, expertise, and creativity when it comes to scaffolding these courses both horizontally and vertically. I also have a wealth of ideas to offer when it comes to writing across the curriculum as well as using technology (effectively) as a central part of instruction. As a teacher myself, I can't wait to share the rewards of my approach with your school.

Not to mention, I know what it's like to be entirely new to these budding, new programs, where resources and guidance are often scarce to start. I've dusted off the trail; now let me pave the path for you. It may be a sacrifice leaving the four walls of my own classroom, but I'm making an even greater impact being welcomed into yours.

edPioneer believes in an “edovative” approach to teaching and learning, one that encourages student-centered, inquiry-based exploration. Our services aim to cultivate a natural curiosity for learning on your campus, one that steers learners not just toward problem-solving, but also problem-*finding*; one where they'll pursue academic passion in order to ultimately discover their professional purpose.

Let's blaze the trail together.

Drop me a line if you're interested in taking a peek at my list of consulting services and fees, if you have questions, or if you'd like further information. I look forward to speaking with you.

Yours in Education,

Jill Pavich, M.Ed., NBCT
